

Symantec USMC-Wide Enterprise BPA

What is it?

On May 21st, 2010 the United States Marine Corps established an enterprise agreement with Marzik for Symantec, Veritas and Altiris products to provide discounted pricing exclusively to the Marine Corps under BPA number FA8771-05-A-0301, MU61.

How long is the term?

The agreement is a 3 year term with the period of performance of 27 May 2010 – 26 May 2013.

Who can use it?

This agreement is available for use by the United States Marine Corps, USMC contractors, USMC civilians and USMC Reserves.

Which products are part of the agreement?

All Symantec solutions are included in the USMC BPA including, security solutions, information risk and compliance, disaster recovery and data protection, and infrastructure management.

Access your BPA Pricing

Step 1: Request a quote from Marzik at usmcbpa@marzik.com

Step 2: Contact MCSELMS to place a purchase order at <https://www.mcselms.mcsc.usmc.mil/>

Step 3: Once approved, license keys will be emailed to the specified contact

Is there anything else included?

- Also included in this agreement is Symantec's basic support with access to the latest content, product enhancements, and patches
- Availability of upgrades
- Access to our call centers during regional business hours for general inquiries and assistance

Maintenance for Symantec Solutions

Maintenance should be co-termed to the end of the agreement, 26 May 2013, with the anticipation that at the end of the contract a master maintenance renewal will be executed by MCSELMS.

BPA Questions and Support

MCSELMS Program Office 866-912-6247 or

<https://www.mcselms.mcsc.usmc.mil/>

The Symantec USMC-Wide Enterprise BPA is for use of the following Symantec Solutions families:

Security

Manage and secure infrastructure, information, and interactions against a growing array of increasingly sophisticated threats

- Endpoint Protection** - delivers defense against malware in a single agent by combining AntiVirus with advanced threat protection for laptops, desktops, and servers
- Brightmail** - delivers inbound and outbound messaging security, with effective and accurate real-time antispam and antivirus protection, advanced content filtering, data loss prevention, and email encryption
- Network Access Control** - controls access to networks, enforces endpoint security policy, and easily integrates with existing network infrastructures

Information Risk and Compliance

Ensure compliance with external and internal policies for securing and managing information

- Data Loss Prevention** - discover where confidential data is stored, monitor how confidential data is being used, protect and prevent confidential data loss and manage and enforce unified data security policies
- Control Compliance Suite** - allows organizations to automate IT compliance processes, including policy management, assessment and remediation of IT controls, and IT audit and compliance reporting
- Risk Automation Suite** - continuously discover and visualize all IT networks and assets, prioritize risk accordingly, and measure remediation efforts for the most complete, accurate, repeatable risk assessment of the IT environment

Disaster Recovery and Data Protection

Prepare and recover both data and systems in instances of equipment failure, accidental loss of data or a disaster by automating backup and recovery, application clustering, and data replication

- NetBackup 7** - provides the ability to protect complete, store efficiently, recover anywhere, find easily, and manage centrally
- NetBackup PureDisk** - the deduplication engine for NetBackup, enabling efficient, storage optimized data protection for the data center, remote offices, and virtual environments.
- Backup Exec 2010** - delivers reliable backup and recovery, integrated deduplication, and archiving technology on virtual or physical systems
- Veritas Cluster Server** - allows IT managers to maximize resources by moving beyond reactive recovery to proactive management of application availability

Infrastructure Management

Standardize, automate, and consolidate infrastructure operation to reduce complexity, reduce costs, and improve efficiency

- Altiris Client Management** - deploys, manages, migrates, and troubleshoots clients within an IT environment from a central web-based management console
- Asset Management** - maximizes existing IT investments by actively eliminating unnecessary costs, managing contracts, aligning service resources with ITIL standards, and accurately measuring asset total cost of ownership
- IT Lifecycle Management and Workflow** - actively manages the entire asset lifecycle and aligns service resources to optimize your IT investments

Maintenance should be co-termed to the end of the agreement, 26 May 2013, with the anticipation that at the end of the contract a master maintenance renewal will be executed by MCSELMS.

BPA FA8771-05-A-0301, MU61 has been established to provide discounted pricing on Symantec products exclusively to the Marine Corps. Please send all purchase orders to the MCSELMS program office.
